SUMMARY

B.Tech Computer Science student with a strong foundation in Full Stack Web Development, Python, Java, SQL, and software development concepts. Hands-on experience with HTML, CSS, Flask, Streamlit, and database technologies, along with knowledge of frontend and backend development. Skilled in developing web applications, integrating application logic with data, and solving programming problems using practical development approaches. Quick learner with a strong interest in building scalable, user-friendly, and efficient software solutions.

WORK EXPERIENCE

AI and Data science Intern

Sep 2026 - Present

During my AI & Data Science internship, I worked on an Internship Recommendation Engine using Python, Pandas, NumPy, and Scikit-learn. I worked with student, internship, and rating data to build a system that recommends suitable internships based on student profiles, skills, interests, and preferences. I implemented content-based, collaborative, and hybrid recommendation approaches and evaluated the recommendations using Precision, Recall, and RMSE. Through this internship, I gained practical experience in data preprocessing, machine learning, recommendation systems, and model evaluation.

EDUCATION

University of Engineering and Management, Jaipur

2023 - 2027

- B.tech in Computer Science & Engineering
- CGPA: 8:00

Central Board of Secondary Education

March 2023

- Senior Secondary Examination
- Percentage: 55.7%

Central Board of Secondary Education

March 2021

- Secondary Examination
- Percentage: 67.6%

PREOJECT

• AI Registration Chatbot :

August 2026

Developed an AI-based Registration Chatbot using Python, Rasa, NLP, and Scikit-learn to automate user registration through conversational interactions. Implemented intent recognition, entity extraction, input validation, duplicate checking, and registration confirmation. Gained practical experience in NLP, machine learning, and REST API integration.

• AI Internship Recommendation Engine:

September 2026

Developed an AI-based recommendation system using Python, Pandas, NumPy, and Scikit-learn to suggest suitable internships based on student profiles, skills, interests, and ratings. Implemented content-based, collaborative, and hybrid filtering to generate personalized recommendations.

CERTIFICATES

- Google AI
- Python for Data Science
- Introduction to Internet of Things

Coursera

NPTEL

NPTEL

SKILLS

- **Programming:** Python, Java
- **Web Development:** HTML, CSS, Flask, Streamlit
- **Database:** SQL, MySQL
- **Data & AI:** Pandas, NumPy, Scikit-learn, Machine Learning
- **Tools:** Git, GitHub, VS Code
